1- The option –q is used with the command who to display: a) The time of the last system boot. b) The current runlevel. c) The names and number of connected users. d) The idle time for each user.	**2- Which option is used with the command grep to display all lines not containing the given pattern?** a) –v b) –c c) –n d) –x
3- The option –o is used with the command sort to: a) Ignore spaces at the beginning of the line. b) Ignore lowercase and uppercase differences. c) Reverse the sort order. d) Save the sorted output in a file.	**4- Which option is used with the command cp to make a backup copy of each existing destination file?** a) –f b) –b c) –v d) –i
5- Which criteria is used with the command find to search files owned by a given group? a) –owner b) –group c) –gowner d) –name	**6- Which option is used with the command rm to remove the contents of directories recursively?** a) –d b) –f c) –i d) –r
7- After the creation of a new directory, its permissions are: rw- r-- --- **What is the value of the mask (umask) to define these permissions?** a) 046 b) 640 c) 731 d) 137	**8- The option –w is used with the command grep to display :** a) The number of lines containing the given pattern. b) The lines containing a given pattern that form whole words. c) The lines not containing the given pattern. d) The lines containing the given pattern

9- The option –b is used with the command who to display:

a) The time of the last system boot.

b) The current runlevel.

c) The names and the number of connected users.

d) The idle time for each user.

10- The option –r is used with the command sort to :

a) Ignore spaces at the beginning of the line.

b) Ignore lowercase and uppercase differences.

c) Reverse the sort order.

d) Save the sorted output in a file

11- Which command is used to delete all files having only 4 characters as name and which the first character is not e ? a) rm ?e!!!

b) rm [?e]!!!

c) rm !e???

d) rm [!e]???

12- The file /etc/group contains the list of all groups. Each group is represented by a single line containing in general 4 fields. What is the content of the 4th field ?

a) The name of the group.

b) The password of the group.

c) The list of users members of the group.

d) The identification number of the group.

13- If you execute the command: *umask 123* then you create a directory named *ts*, what are the permissions on this directory? a) r-- r-x rw-

b) rw- r-x r--

c) -wx -w- --x

d) --x -w- -wx

14- Which option is used with the command rm to remove the contents of directories recursively? a) –d

b) –f

c) –i

d) –r

15- The user student has the following line in the file /etc/passwd (file containing the list of all users):

student:x:505:506:507508:/home/student:/bin /bash

Which value represents the identification number of this user (uid) ? a) 505

b) 506

c) 507

d) 508

16- The option –v is used with the command grep to display:

a) The number of lines containing the given pattern.

b) The lines containing the given pattern.

c) The lines not containing the given pattern.

d) The lines containing a given pattern that exactly match the whole line

17- Which option is used with the command chgrp to change recursively the group owner of directories and their contents ? a) –U b) –G c) –R d) –O	**18- The file /etc/group contains the list of all groups. Each group is represented by a single line containing in general 4 fields. What is the content of the 3rd field ?** a) The name of the group. b) The password of the group. c) The list of users members of the group. d) The identification number of the group.

19- Which command is used to list all files which the name begins with a digit ? a) ls [!0-9]* b) ls [!a-z]* c) ls [0-9]* d) ls [a-z]*	**20- Which option is used with the command tail to indicate the number of lines to display?** a) –c b) –n c) –q d) –s
21- The command to display the first 10 lines of a file named "file.txt" is: a) head -n 10 file.txt b) tail -n 10 file.txt c) cat 10 file.txt d) less 10 file.txt	**22- which command is used to change the ownership of a file in Unix?** a) chperm b) chmod c) chown d) chgrp
23- what does the "grep" command do? a) Edits files interactively b) Searches for patterns in files c) Compile source code d) Lists files in directory	**24- The command "df -h" is used to:** a) Display a file's contents in humanreadable form b) Check the disk space usage in human-readable format c) Display the first few lines of a file in human-readable form d) Find hidden files in a directory

25- To find the manual page for a specific command, which command should be used? a) info b) help c) man d) doc	**26- which command is used to delete a directory and all its contents?** a) rmdir b) rm c) rm -r d) del
27- the "ps" command is used to: a) print system status b) display the current processes c) search for files in a directory d) synchronize files	**28- The option "-i" with the "cp" command does what?** a) Ignores errors during copying b) Copies files interactively c) Asks for confirmation before overwriting files d) Copies files incrementally
29- Which command is used to display the last few lines of a file? a) head b) tail c) cat	**30- which command is used to display the disk usage of a directory and its subdirectories?** a) du b) df c) ls

d) less	d) disk
31- the command "chmod 755 file.txt" does what? a) Sets read and write permissions for the owner, and read for others b) Sets read, write, and execute permissions for the owner, and read and execute for others c) Sets read and write permissions for the owner, and no permissions for others. d) Sets all permissions for the owner and no permissions for the owner and no permissions for others	**32- What does the "-r" option do when used with the "cp" command?** a) Copies files recursively b) Renames files after copying c) Copies files randomly d) Resumes a paused copy operation

33- To display the current working directory, which command should be used? a) cd b) pwd c) dir d) ls	**34- which command is used to compare two files and show the differences between them?** a) compare b) diff c) cmp d) comm
35- What does the "kill" command do? a) Starts a process b) Displays information about a process c) Terminates a process d) Pauses a process	**36- Which option is used with the "ls" command to display hidden files?** a) -h b) -a c) -l d) -i
37- To find the path of a command, which command is used? a) locate b) which c) find d) path	**38- which option is used with the "rm" command to remove directories and their contents recursively?** a) -f b) -d c) -r d) -i
39- The "chmod" command can change file permissions using symbolic mode. What does "chmod u+x file" do? a) Removes execute permission for the user b) Adds execute permission for the user c) Removes execute permission for the group	**40- Which option is used with the "grep" commang to display the line number of matching lines?** a) -i b) -n c) -c

d) Adds execute permissions for others	d) -l
41- The "ln" command is used to create links between files. Which option creates a symbolic link instead of a hard link? a) -s b) -h c) -l d) -f	**42- To display a list of all background jobs in the current shell, which command is used?** a) jobs b) ps c) bg d) fg

43- What does the "-f" option do when used with the "tail" command? a) Displays the first few lines of a file b) Follows the file as it grows, displaying new lines as they are added c) Forces the command to execute without prompting d) Filters the output based on a pattern	**44- Which command is used to change the group ownership of a file?** a) chgrp b) chown c) chmod d) chperm
45- what does the "-h" option do when used with the "du" command? a) Displays the file size in blocks b) Display the file size in bytes c) Display the file size in human-readable format d) Displays the file size in kilobytes	**46- Which option is used with the "find" command to execute a command on each file found?** a) -exec b) -name c) -type d) -print
47- What does the "-p" option do when used with the "mkdir" command? a) Creates a new directory without any parent directories b) Creates a new directory and sets the permissions c) Creates parent (intermediate) directories as needed d) Prints the path of the newly created directory	**48- The command "tar -czvf archive.tar.gz /path/to/directory" does what?** a) Extract files from an archive b) Compresses and archives a directory c) Lists the contents of an archive d) Updates files in an archive
49- Which option is used with the "mv" command to prompt before overwriting a file? a) -u b) -f c) -i	**50- The "tar" command with which option extracts files from an archive?** a) -c b) -x c) -t d) -z

d) -b	

51- Which command is used to change the password of a user in Unix? a) passwd b) chpwd c) setpwd d) changepwd	**52- To list all files, including hidden files, in a directory, which option is used with the "ls"?** a) -a b) -l c) -R d) -t
53- What does the "-r" or "-R" option do when used with the "chmod" command? a) Changes permissions recursively for all files and directories b) Removes read permissions for all users c) Applies permissions only to directories d) Applies permissions only to files	**54- Which option with the "find" command searches for files by name?** a) -type b) -name c) -exec d) -print
55- To display the contents of a file in reverse order, which command can be used? a) rev b) tac c) nl d) od	**56- Which option with the "ping" command specifies the number of packets to send?** a) -t b) -c c) -n d) -i
57- What does the "-L" option do when used with the "ln" command? a) Creates a hard link b) Creates a symbolic link c) Dereferences symbolic links when creating links d) Lists the links in a directory	**58- Which option is used with the "grep" command to display only the count of matching lines?** a) -c b) -n c) -v d) -l
59- What does the "-d" option do when used with the "rmdir" command? a) Deletes a directory and its contents b) Deletes directories recursively c) Removes an empty directory d) It is not a valid option for "rmdir"	**60- Which command is used to display the last few lines of a file in real-time as it is being written to?** a) head b) tail -f c) less d) more

61- Which command displays the current month's calendar? a) date b) cal	**62- What does the "-i" option do when used with the "rm" command?** a) Forces removal without prompting
c) time d) calendar	b) Removes files interactively, prompting before each removal c) Ignores nonexistent fi d) Remove file recursive
63- Which command is used to count the number of lines, words, and characters in a file? a) count b) wc c) grep -c d) lines	**64- Which option with the "df" command displays the file system type?** a) -t b) -h c) -T d) -f
65- Which option is used with the "tar" command to create an archive? a) -c b) -x c) -t d) -f	**66- Which option is used with the "mv" command to move a file or directory only if the destination does not exist?** a) -n b) -i c) -f d) -u
67- The "ps" command is used to display information about processes. Which option shows all processes running on the system? a) -a b) -e c) -x d) -l	**68- What does the "-l" option do when used with the "ls" command?** a) Lists in long format, showing permissions b) Lists only directories c) Lists files in reverse order d) Lists files with detailed information

69- To search for a file with a specific name in a directory and its subdirectories, which command is used? a) find b) grep c) locate d) search	**70- Which option is used with the "chmod" command to set the permissions recursively?** a) -R b) -r c) -rwx d) -x
71- What does the "-q" option do when used with the "rm" command? a) Removes files quietly, without displaying output. b) Removes files interactively, prompting before each removal	**72- Which command is used to print the current user's login name?** a) login b) user c) whoami d) uname

c) Removes read-only files d) Removes files from the trash.	
73- To display the manual page for a command, which command is used? a) man b) help c) info d) doc	**74- Which option is used with the "touch" command to create a file if it does not exist?** a) -c b) -f c) -a d) -m
75- What command is used to display the current value of the umask? a) umask -s b) umask -v c) umask d) umask -c	**76- Which command is used to create a symbolic link to a file?** a) ln -h b) ln -s c) link -s d) link
77- To display all the users currently logged into the system, which command is used? a) who b) w c) users d) allusers	**78- What does the "-p" option do when used with the "cp" command?** a) Copies files with their parent directory structure b) Preserves the file attributes (such as timestamps and permissions) c) Prompts before overwriting files d) Copies files in parallel

79- Which command is used to search for a string within files in a directory and its subdirectories? a) find b) grep -r c) search d) locate	**80- Which option is used with the "chown" command to change the owner of a directory and its contents recursively?** a) -r b) -f c) -R d) -i
81- What does the "-s" option do when used with the "useradd" command? a) Sets the default shell for the user b) Specifies the user's home directory c) Sets the user's password d) Create a system user	**82- To count the number of directories in the current directory, which command would you use?** a) ls -d */ | wc -l b) ls -l | grep ^d | wc -l c) find . -type d | wc -l d) ls -dir | wc -l
83- What does the "-z" option do when used with the "tar" command? a) Compresses the archive using gzip	**84- Which command is used to display a list of running processes?** a) jobs

b) Extracts files from an archive c) Lists the contents of an archive d) Updates files in an archive	b) ps c) top d) proc
85- Which command is used to rename a file? a) rename b) move c) mv d) cp	**86- The "df" command is used to:** a) Display the amount of free disk space b) Display the disk format c) Display the file system type d) Display the disk usage of a directory
87- To search for a file named "file.txt" starting from the root directory, which command would you use? a) locate file.txt b) find / -name file.txt c) grep file.txt / d) search / file.txt	**88- Which command is used to display the contents of a file one screen at a time?** a) cat b) less c) tail d) head

89- Which option is used with the "du" command to display the disk usage of directories and their subdirectories in a human-readable format? a) -h b) -k c) -m d) -s	**90- Which command with the "chmod" command removes the read permission for others?** a) o-r b) o+w c) o-rw d) o+x
91- What does the "-t" option do when used with the "cp" command? a) Copies files in text mode b) Preserves the modification times of the copied files c) Copies files recursively d) Prompt before overwriting files	**92- Which command is used to display detailed information about a file, including its type and permissions?** a) file b) ls -l c) stat d) info
93- To kill a process by its process ID (PID), which command is used? a) kill b) terminate c) stop d) end	**94- The "df" command with which option displays the file system type?** a) -T b) -h c) -t d) -a
95- Which command is used to change the current working directory? a) cd	**96- What does the"-c" option do when used with the "wc" command?** a) Counts the number of characters in a file

b) pwd c) chdir d) home	b) Counts the number of words in a file c) Counts the number of lines in a file d) Counts the number of bytes in a file
97- Which command is used to display the path of the current working directory? a) cd b) pwd c) path d) dir	**98- The "-v" option is used with the "grep" command to:** a) Display only the matching lines b) Display the version of "grep" c) Invert the match to display non-matching lines d) Display verbose output

99- Which command is used to terminate a process by name rather than by process ID?

a) kill
b) pkill
c) terminate
d) end

100- The "find" command with which option searches for files modified in the last 24 hours?

a) -ctime -1
b) -mtime -1
c) -atime -1
d) -mmin -1

101- What does the "-i" option do when used with the "sort" command?

a) Ignores cases differences in the sort
b) Sorts in reverse order
c) Sorts numerically
d) Sorts by the third field

102- Which option with the "ps" command displays a full list of processes including those without controlling terminal? a) -a
b) -x
c) -e
d) -f

103- The "chmod" command with the "+x" option is used to:

a) Add execute permissions to a file
b) Remove execute permissions from a file
c) Change the ownership of a file
d) Change the group of a file

104- Which option is used with the "head" command to display a specific number of lines from the beginning of a file? a) -l
b) -n
c) -c
d) -m

105- Which command will delete all files in the current directory that start with a lowercase letter? a) rm [a-z]*
b) rm [A-Za-z]*
c) rm [a-z]*.*
d) rm [a-zA-Z]*

106- To delete all files in the current directory and its subdirectories that end with ".bak", which command is correct? a) rm -r *.bak
b) find . -name "*.bak" -exec rm {} \;
c) find . -type f -name "*.bak" -delete
d) both (b) and (c)

107- To delete all files in the current directory whose names contain digits, which command should be used? a) rm *[0-9]*
b) rm *[0-9]
c) rm *[0-9]*.*
d) rm [0-9]*

108- Which command is used to find all directories in the current directory? a) find . -type d
b) find . -type f
c) find . -d
d) find . -dir

109- Which command is used to delete all files with exactly 5 characters in their names in the current directory? a) rm ????? b) rm *???? c) rm ??? d) rm ??????	**110- To find all files modified in the last 7 days in the current directory, which command is correct?** a) find . -mtime -7 b) find . -ctime -7 c) find . -atime -7 d) find . -mtime +7
111- To delete all hidden files (those starting with a dot) in the current directory, which command should be used? a) rm .* b) rm \.* c) rm .* d) rm .?*	**112- Which command is used to find all files that do not end with ".log" in the current directory?** a) find . ! -name "*.log" b) find . -not -name "*.log" c) find . -name "!*.log" d) Both (a) and (b)
113- To delete all files in the current directory that have a ".tmp" extension, which command would you use? a) rm *.tmp b) rm ?*.tmp c) rm *.tmp? d) rm .tmp	**114- Which command is used to find and delete all empty files in the current directory and its subdirectories?** a) find . -type f -empty -delete b) find . -type f -size 0 -exec rm {} \; c) find . -empty -exec rm {} \; d) find . -empty -delete
115- The file "/etc/resolv.conf" is used to: a) Configure DNS servers b) Define filesystem mount points c) Store user passwords d) Set system time and date	**116- What does the "/etc/hosts" file do?** a) Maps hostnames to IP addresses b) Stores information about users c) Configures firewall rules d) List available network interfaces
117- Which file contains the default shell configuration for all users? a) /etc/bashrc b) /etc/profile c) /etc/shells d) /etc/default/useradd	**118- What information is stored in the "/etc/shadow" file?** a) Group information b) Encrypted user passwords c) User account information d) Network configuration

119- In the "/etc/passwd" file, what is the third field?

a) The username
b) The user ID (UID)
c) The group ID (GID)
d) The home directory

120- The file "/etc/hostname" contains:

a) The hostname of the system
b) The domain name of the system
c) The list of all hosts
d) The list of all network interfaces

121- Which file contains the list of all users on the system?

a) /etc/group
b) /etc/shadow
c) /etc/passwd
d) /etc/login.defs

122- What does the file "/etc/fstab" contain? a) Information about filesystem mount points

b) Information about network interfaces
c) User account information
d) System log files

123- What is the effect of the command "chmod 755 file.txt"? a) Grants read, write, and execute permissions to the owner, and read and execute permissions to group and others.

b) Grants read and write permissions to the owner, and read and execute permissions to group and others.
c) Grants read and execute permissions to the owner, and read, write, and execute permissions to group and others.
d) Grants full permissions to the owner, and no permissions to group and others.

124- If a file has the permissions "rwx r-x r--", what does it mean? a) The owner has read, write, and xecute permissions; the group has read and execute permissions; others have read permissions

b) The owner has read and write permissions; the group has read and execute permissions; others have execute permissions.
c) The owner has execute permissions; the group has read and write permissions; others have read and execute permissions.
d) The owner has read, write, and execute permissions; the group has read and write permissions; others have read permissions.

125-

Add write permission for the group on file.txt

The permission "chmod g+w file.txt" will:

a)

b) Add write permission for the owner on file.txt

c) Add write permission for others on file.txt

d) Add write permission for all users on file.txt

126- What is the default "umask" value for a regular user in most Linux distributions?

a) 022

b) 002

c) 027

d) 077

127- What is the default permission set for a new file created with a umask of 002? a) rw- rw- r--

b) rw- r-- r--

c) rwx rwx r--

d) rw- rw- rw-

128- The "-k" option with the "sort" command is used to:

a) Sort based on a specific field or column

b) Sort the file in reverse order

c) Sort the file numerically

d) Sort and remove duplicate lines

129- The "-n" option with the "head" command is used to:

a) Display the line numbers

b) Display the next N lines

c) Display the first N lines

d) Display lines containing a number.

130- Which command is used to display the last 10 lines of a file by default?

a) tail

b) head

c) cat

d) less

131- What does the command "usermod -G newgroup username" do?

a) Changes the primary group of the user

b) Adds the user to the new secondary group

c) Deletes the user from the old group

d) Lists all groups the user belongs to

132- Which command is used to add a new user to the system? a) adduser

b) usermod

c) userdel

d) useradd

133- The group ID (GID) of a user is found in which field of the "/etc/passwd" file? a) the 3rd fiels b) the 4th field c) the 5th field d) the 6th field	**134- In the "/etc/shadow" or "/etc/passwd" file, what does the second field represent?** a) Username b) Encrypted password c) User ID (UID) d) Last password change date
135- Which command is used to display user information, such as UID, GID, and home directory? a) who b) id c) useradd d) passwd	**136- In the file "/etc/passwd", which field represents the home directory of the user?** a) the 3rd field b) the 5th field c) the 6th field d) the 7th field
137- The "-n" option with the "sort" command is used to : a) Sort the input numerically b) Sort the input in reverse order c) Sort the input by month d) Sort the input by file size	**138- The option "-p" with the "passwd" command is used to:** a) Change the password of a user b) Create a password for a user c) Assign a password to a group d) Change the password interactively

139- The "-f" option with the "chmod" command is used to: a) Forcefully change permissions b) Change permissions of a file only c) Suppress most error messages d) Change permissions recursively	**140- The option "-u" with the "tar" command is** Update files in an archive if they are newer than the copy in the archive **used to:** a) b) Extract files from an archive c) Create a new archive d) List the contents of an archive
141- Which option with the "ls" command provides a long listing format? a) -a b) -l c) -r d) -t	**142- Which option is used with the "tar" command to compress the archive using gzip?** a) -z b) -j c) -c d) -x

143- The "-m" option with the "mkdir" command is used to: a) Create intermediate directories as required b) Set permissions of the directory c) Print a message for each created directory d) Create multiple directories at once	**144- Which option is used with the "kill" command to specify a signal to send to a process?** a) -s b) -p c) -i d) -a
145- The "-s" option with the "ls" command is used to: a) Display hidden files b) Sort files by size c) Display file types d) Display file sizes	**146- Which option with the "find" command searches for files modified within the last N days?** a) -name b) -mtime c) -atime d) -ctime
147- In the "/etc/passwd" file, the password placeholder is typically represented by which character? a) * b) x c) ! d) -	**148- The "/etc/group" file is used by which command to verify group membership?** a) groupadd b) usermod c) groups d) groupdel
149- Which command will list all files that do not have an extension? a) ls *.*	**150- How can you list all files starting with "abc" followed by exactly three digits?** a) ls abc[0-9][0-9][0-9]

b) ls * c) ls *. d) ls *.?	b) ls abc[0-9]{3} c) ls abc[0-9][0-9][0-9]* d) ls abc[0-9][0-9][0-9].*
