Electronic engineers play a crucial role in shaping the technological landscape of our modern world. These professionals design, develop, and test electronic systems and components, which are integral to various industries, including telecommunications, healthcare, automation, and consumer electronics. Their expertise drives innovation, enhances efficiency, and contributes to advancements that define contemporary life.

Electronic engineers are involved in a wide range of activities, from conceptual design to the deployment of electronic systems. Their primary responsibilities include:

1- Circuit Design and Development: Designing circuits and electronic components for devices, also developing schematics and layout designs for printed circuit boards (PCBs).
2- System Integration: Integrating electronic components into larger systems and ensuring compatibility and optimal performance of integrated systems.
3- Testing and Validation: Conducting rigorous testing of electronic components and systems, and implementing quality control measures to ensure reliability and efficiency.
4- Research and Development: Engaging in R&D to innovate new technologies and improve existing ones, also staying updated with emerging trends and technological advancements.
5- Project Management: Leading projects from conception to completion, and collaborating with multidisciplinary teams to achieve project goals.

Electronic engineers are at the forefront of technological innovation, driving progress across multiple industries. Their expertise and creativity are essential in developing the electronic systems and devices that define our modern world.

I- Comprehension:

1- What do electronic engineers do? **(1pt)**
2- Name two industries where electronic engineers are important. **(1pt)**
3- Why is research important for electronic engineers? **(1pt)**
4- What role do electronic engineers play in project management? **(1pt)**
5- Pick out words from the text which have the same or similar meanings: **(1pt)**
essential - proficiency - elements - involve

II- A- What is the type of the underlined sentence in the text? **(1pt)**

B- Join these pairs of sentences using who/where/whose/which/whom. **(2pts)**

1- These are the guys. I work with them.
2- That is the house. I babysit there most weekends.

C- Fill in the blanks with a suitable word from the box: **(2pts)**

wireless - connectivity - electronic - data

1- Developing infrastructure for next-generation --------- communication.
2- Enabling faster ------ transfer rates and more reliable ----------.
3- Innovating eco-friendly ---------- components and systems.
4- Focusing on ---------- energy efficiency and reducing electronic waste.

D- Choose the correct option: **(1pt/ correct answer)**

1- "Did they understand what you said to them?"
a- He asked me if they have understood what I said to them.
b- He asked them if they have understood what I said to them.
c- He asked me if they had understood what I said to them.

2- You'll have trouble ---------- this afternoon.
a- to commute
b- commuting
c- to commuting

3- I / not travel / next week
a- I won't be travelling next week.
b- I won't be travel next week.
c- I wouldn't be travelling next week.

4- We ---------- TV yesterday if Sami hadn't bought the cinema tickets.
a- Will watch
b- Would have watched
c- Would have watch

5- Nobody ---------- the trouble I've seen.
a- Know
b- Knows
c- Knowing

III- Writing: **(5 pts)**

As we move deeper into the 21st century, the rapid pace of technological advancement holds the promise of revolutionary new developments in the field of electronics.

Write a well-developed composition about your vision of the future new technologies that might work on electronics. Do you think it will be helpful for people?
