الجمهورية اللبنانية
وزارة التربية والتعليم العالي
المديرية العامة للتعليم المهني والتقني

الامتحانات الرسمية لشهادة الإمتياز الفنية
لدورة عام ٢٠٢٤ الثانية

الاسم والشهرة:----------

رقم المرشح :----------

الاختصاص والرمز : الالكترونيك (٢٠٢٠١)
المادة : اللغة الإنكليزية التقنية
المستندات المسموح بها : لا شيء

المعدل : (٤)
المدة : ساعة واحدة

الإجابات على "كراس الإجابة"

Read the text and answer the questions:

Generative Pre-trained Transformer (GPT), is a type of artificial intelligence model that excels at understanding and generating human-like text. In the realm of electronics, GPT can be applied in several ways:

1. Electronic Component Classification: GPT can be trained to recognize and classify various electronic components based on textual descriptions or images, aiding in inventory management and quality control processes.
2. Design Assistance: Engineers can utilize GPT to assist in the design process of electronic circuits and systems by generating design specifications, suggesting component configurations, or even proposing innovative solutions to design challenges.
3. Fault Diagnosis: GPT can analyze textual descriptions of electronic system malfunctions to help diagnose faults and suggest troubleshooting steps, potentially reducing downtime and maintenance costs.
4. Documentation Generation: GPT can generate technical documentation for electronic products, such as user manuals, datasheets, and application notes, based on input from engineers or product specifications.
5. Natural Language Interfaces: GPT-powered natural language interfaces can enhance the user experience of electronic devices by enabling more intuitive interactions through voice commands or text-based communication.

Overall, GPT's capabilities in natural language understanding and generation offer numerous opportunities for improving various aspects of electronics design, manufacturing, and usage.

I- Comprehension:

1- What does GPT stand for? What is it good at? **(1pt)**
2- How does GPT assist engineers in designing electronic circuits? **(1pt)**
3- What kind of documents can GPT create for electronic products? **(1pt)**
4- How can GPT make it easier to use electronic devices? **(1pt)**
5- Pick out words from the text which have the same or similar meanings: **(1pt)**
a- performs b- help c- countless d - enrich

II- A- What is the type of the underlined sentence in the text? **(1pt)**

B- Pick out from the text: **(2pts)**
- Two words with suffixes and derive their verbs.
- A sentence in the passive form.

C- Change the following sentences from active to passive: **(2pts)**
1- The worker operated the heavy machinery.
The heavy machinery _____
2- The construction workers are building a new bridge.
A new bridge _____

D- Choose the correct option: **(5pts)**

1- "Are you sorry for what you did?"
a- The mother asked her son if he was sorry for what he had did.
b- The mother ask her son if he was sorry for what he had done.
c- The mother asked her son if he was sorry for what he had done.

2- What we never expected was that eight dollars -------- our last bargain.
a- Weren't
b- Wasn't
c- Aren't

3- To --------- around the world requires a lot of time and money.
a- Travelling
b- Travel
c- Travelled

4- We ---------- TV yesterday if Sami had not bought the football game tickets.
a- Will watch
b- Would have watched
c- Would have watch

5- If you ---------- well, you ---------- your exams.
a- Studied - would pass
b- Will study - pass
c- Study - will pass

III-Writing: **(5pts)**
Write a well-developed composition about the challenges and opportunities of integrating GPT into electronic devices.
